

To Parents and Guardians,

Did you know that your child can access many of the same software titles that they use at school at home? It's true! Our school website has a page called "Kids Tools" that your child uses practically every day here at Searsport Elementary School. Here, you can have the same easy access to many of the programs we use during the day at home! Some programs, like Lexia, IXL, and Google, require a login, and your teacher will be able to provide you with your child's login information. Others, like Newsela, Khan Academy, and SeeSaw, can be accessed with the same login that students use for Google. Others still require no login at all! There is also a "For Parents" section where you can learn about accessing some of these services at home. Some of these services can even be installed on Android and iPad tablets! The Kids Tools page is designed to be a valuable resource at both school and home, and I hope you'll keep this page handy so that your child can have easy access to the digital tools they need to learn from anywhere!

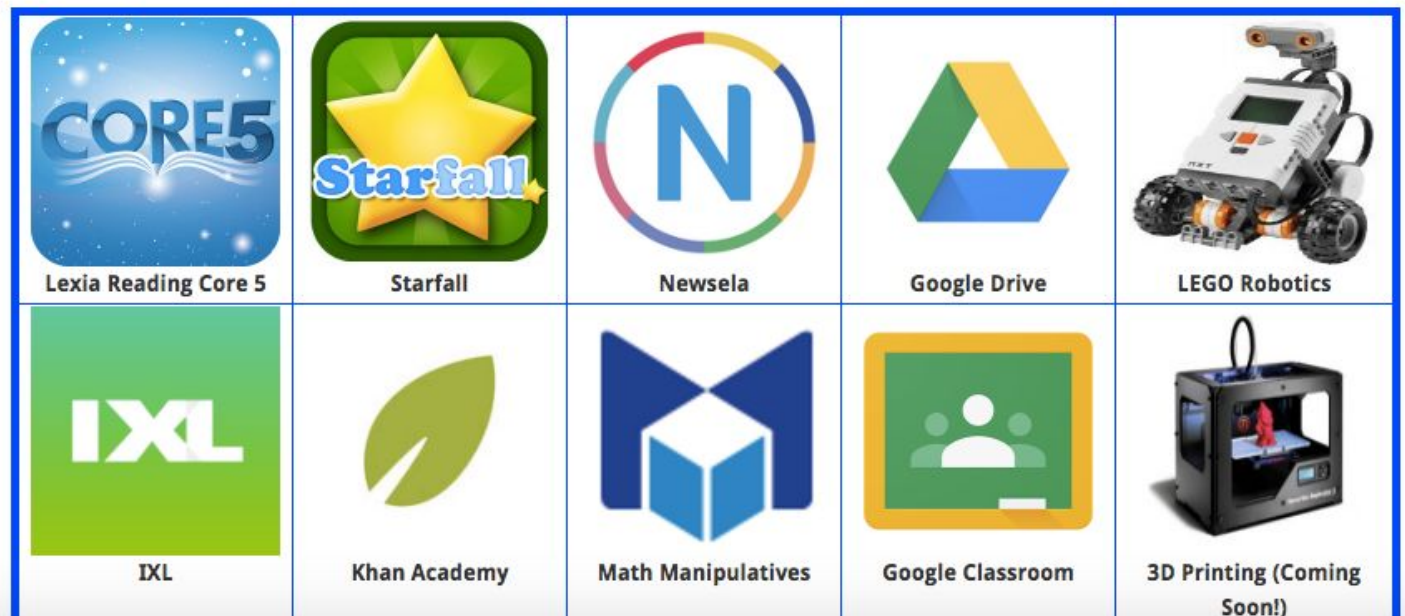

Check it out!
